**ANSWERS**

1. Answer: Option C

Explanation : Ganga, Godavari, Yamuna and Krishna gives the correct descending order by length of the rivers of India.

2. Answer: Option C

Explanation : Zaskar – Shyok – Sutlej – Spiti is the correct sequence of the given rivers in India from north towards South.

3. Answer: Option D

Explanation : Tributary – Main river

Chambal – Yamuna

Son – Ganga

Manas – Brahmaputra

4. Answer: Option C

Explanation : Sutlej is a trans-Himalayan river. The Trans-Himalayan Rivers originate beyond the Great Himalayas. These are the Indus, the Sutlej and the Brahmaputra rivers. Himalayan rivers are those which originate in the Himalayas and flow through the Northern Plains, e.g., the Ganga, the Yamuna and their tributaries.

5. Answer: Option C

Explanation : The Alamatti is on the river Krishna. The Alamatti reservoir built across River Krishna has reached the maximum level due to heavy rainfall in Maharashtra.

6. Answer: Option C

Explanation : The Peninsular rivers which do not join the Arabian Sea are Godavari and Krishna.

7. Answer: Option A

Explanation : Kolkata is an inland riverine port. It is situated along the Hoogly river.

8. Answer: Option A

Explanation : The main river flowing in the state of Jammu and Kashmir is Jhelum. The Jhelum River is the only major Himalayan river which flows through the Kashmir valley. The Indus, Tawi, Ravi and Chenab are the other major rivers flowing through the state.

9. Answer: Option A

Explanation : Godavari rivers is known as 'Vridha Ganga' because of its large size and extent among the peninsular rivers.

10. Answer: Option D

Explanation : Mysore city is not located on a river bank. The city is located between two rivers: the Kaveri River that flows through the north of the city and the Kabini River, a tributary of the Kaveri, that lies to the south.
